

# Look to the Specialist in Patented Demolition Track Shoes for Transfer Station and Solid Waste Disposal Applications: **CARON**<sup>®</sup>

The SWS (Solid Waste Shoe) design allows crawlers to work in a wide range of materials, both soil and municipal solid wastes along with construction and demolition materials. The SWS has excellent working capabilities in clay, and may be used for dozing and ripping applications. Ease of rebuilding and extended undercarriage life means added value with the SWS Shoe.

The LTS (Loader and Transfer Station Shoe) with unique contact points and diagonal grouser design allows crawlers to work concrete and asphalt with far less surface damage than with conventional track shoes while providing excellent demolition performance.

Available on CAT  
System One Undercarriage
