

Caron Innovative Solutions in Wire Wrapping and Cap Replacement

Caron Wire Safeguard Group® (WSG)®: Maximum Protection • Minimum Downtime

Wire wrapping problems have met their match. The Wire Safeguard Group is an economical, long-lasting protection system that all but eliminates landfill wire wrap issues and outlasts competitive fabricated steel rings. The WSG can be replaced as part of the normal tip maintenance schedule, resulting in less man hours and less downtime than weld-on rings.

Competitive weld-on guards require more downtime and man hours at replacement
