

The Best Landfill Managers Know the Value of Airspace

Bomag BC1172RB shown with Caron 8" MegaMax®/BMega Wheels and Caron Double Semi-U Trashblade with Push Plate

Continuous Wire Safeguard Group Pattern
Patent # 6,991,401 B2

Al-Jon Advantage with Caron MAX® II Wheels and available Caron built Semi-U Trashblade

Patent # 7,106,452 B2

With the cost of airspace ever increasing, there is more demand on landfill compactor wheels to place even more refuse in *less airspace*. Caron Compactor Co. continues to design and engineer field proven wheels with teeth and trashblades that provide unequalled performance for compactors of all sizes. With experience in landfill technology since 1969, waste handlers who expect the most for their investment insist on our leadership.

CARON® - Chosen Best by Those Who Know!

CAT 836H shown with Caron Maximizer® Wheels and patented Caron Double Semi-U® (DSU®) Trashblade

Patented DSU Trashblade shown with optional Push Plate

Wire Safeguard Group with Field-Proven **Intermittent** Pattern. **IT WORKS!**
Patent # 6,991,401 B2

More Penetration For Better Compaction

When comparing the demolition capability of the CARON Wheel over competitors, in some cases CARON teeth will strike the refuse over 840,000 times *more* in a 10 hour day.
