

CARON[®] TRANSFER STATION WHEELS

Caron Innovation in Transfer Station Technology

Specifically designed to
increase the performance
of loaders and/or compactors
in rugged transfer station
applications.

Caron Transfer Station Wheels, Salt Lake Valley
Transfer Station, Salt Lake City, Utah.

The Caron Transfer Station Wheel

- Provides volume reduction through on-site demolition at transfer stations
- Assists in maximizing legal load limits of trucks/railcars
- Aids in achieving optimum final density at landfill by reducing size and commingling of transported materials
- Reduces potential damage to concrete floors
- Reversed wheel pattern, front to rear, for increased demolition capabilities
- Segmented cleats for ease of replacement
